

WORK ON WOMEN FAT LOSS, METABOLIC HEALTH AND HORMONAL BALANCE

Duration of program

- 1 Month- Trial phase
- 2 Months- Foundation building
- 3 Months- Fat loss phase
- 4 Months- Metabolic reset phase
- 6 Months- Sustainability phase permanent transformation

My goal with my clients-

- **To lose on fat loss, not just weight loss-** so results are real and sustainable.
- **To build healthy eating habits** that clients can follow long-term without stress.
- **To improve metabolism and energy levels,** not slow them down with crash diets.
- **To help clients lose fat without starvation or extreme restrictions.**
- **To create a lifestyle that keeps the fat off,** not one that causes rebound weight gain.

I built this method for:

- * Women struggling with **PCOD/PCOS** who feel stuck with irregular cycles, weight gain, acne, or cravings
- * Anyone dealing with **constant bloating**, heaviness, or a “swollen” feeling even after eating clean
- * Women with **hormonal imbalance**—mood swings, fatigue, sleep issues, or low energy throughout the day
- * Those fighting **chronic inflammation** that shows up as pain, puffiness, skin issues, or slow fat loss
- * Women managing **diabetes or insulin resistance** who want stable sugar levels without extreme diets
- * **Post-partum moms** trying to regain energy, metabolism, confidence, and feel like themselves again
- * Women with **thyroid** concerns who feel tired, cold, foggy, or struggle with stubborn weight
- * Anyone dealing with **stress-related** skin issues like acne, pigmentation, dullness, or premature ageing
- * Women who want visible **results** with a simple, sustainable system—not restriction or burnout
- * Anyone tired of guessing what to eat, why their body feels off, or how to actually heal from within

What you will start noticing

In 7 Days

- Reduced bloating & heaviness
- Lighter body feel
- More stable energy

After one month

- Visible inch loss
- De puffed face & clearer skin
- Better food control

By 2 months

- Consistent weight & fat loss
- Strong digestion + minimal bloating
- Improved sleep, mood & focus

At the end of 3 months (phase 1)

- Flat, toned belly & confident body feel
- Low cravings, good energy levels

At the end of 4 months (phase 2)

- Change in metabolic health
- Hormonal balance (blood sugar improved, regular periods, no PMS, fasting insulin improved)
- Reduction in Belly fat (5-7 inches)

By the end of 6 months (phase 3)

- You will be a new person
- You will drop 2 sizes
- Body will become leaner
- Blood markers improved
- You can say Bye Bye to autoimmune condition or any hormonal issues
